PROFESSIONAL SUMMARY

Electronics Engineering undergraduate at Rashtriya Raksha University specialising in Defence Technology. Interested in embedded systems, IoT, smart infrastructure, and technology-driven solutions for public safety, energy efficiency, and healthcare. Experienced in building interactive web-based project platforms and developing concept-driven IoT solutions.

EDUCATION

B.Tech in Electronics Engineering, Specialisation in Defence Technology
Rashtriya Raksha University, Gandhinagar, Gujarat | Undergraduate

ACHIEVEMENTS

- Won and qualified in the Smart India Hackathon (SIH) internal round at Rashtriya Raksha University, ranking #1 in Hardware and #8 overall among the top 64 performing teams.
- Working on multiple national challenges and developing their respective technology-driven solutions.

TECHNICAL SKILLS

IoT & Embedded Systems: Smart sensing, IoT solution design, ESP32-oriented hardware concepts
Web Development: React, Vite, JavaScript, TypeScript, HTML5, CSS3
Frontend & UI: Tailwind CSS, responsive interfaces, interactive dashboards
Tools & Concepts: GitHub, Node.js, SQLite, Three.js/WebGL, role-based portals
Domains: Defence technology, smart infrastructure, smart homes, healthcare technology, energy management

PROJECTS

AQUA SAVIOUR — Smart Underground Water Infrastructure Protection

- Developed an IoT-focused concept for early detection and localisation of underground pipeline leaks to minimise road damage and infrastructure disruption.
- Designed a platform concept with a 3D digital-twin interface, role-based operational portals, and smart monitoring for targeted pipe repair.
- **Technologies:** JavaScript, React/Vite ecosystem, Three.js/WebGL, ESP32 hardware concepts

NEXUS NURTURE — Smart Home & Energy-Saving IoT System

- Built a smart-living project focused on reducing electrical energy consumption and enabling smarter home planning through IoT-based automation concepts.
- **Technologies:** TypeScript, IoT concepts, web application development

DELTA NEURONS — Cognitive Assistance Platform for Elderly Dementia Patients

- Created a full-stack healthcare platform for cognitive gaming, reminiscence activities, and memory assistance for elderly dementia patients in India’s North Eastern Region.
- Included adaptive difficulty, cognitive scoring, caregiver/doctor/admin portals, reminders, offline-first synchronisation, and speech features.
- **Technologies:** Node.js, SQLite, HTML5, CSS3, JavaScript

PERSONAL PORTFOLIO WEBSITE

- Designed and developed a personal engineering portfolio presenting academic background, technical capabilities, and project work.
- **Technologies:** React 19, Vite, Tailwind CSS
